

FAIZAN ALI

Punjab, Pakistan | +92-341-7360786 | faizancode68@gmail.com | linkedin.com/in/faizan-ali-b5a3a7291

EDUCATION

The Islamia University of Bahawalpur — Bahawalpur, Punjab, Pakistan
Bachelor of Science in Software Engineering Oct. 2023 – Oct. 2027

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML, CSS, SQL

Frameworks and Libraries: Django, Django REST Framework, Bootstrap, Tailwind CSS, Selenium, BeautifulSoup, Jinja

Automation and Scraping: Selenium WebDriver, undetected-chromedriver, BeautifulSoup, Requests, SFTP/paramiko

Computer Vision: OpenCV, face_recognition

Developer Tools: Git, AWS, Microsoft Azure, RESTful APIs, Postman, VS Code

EXPERIENCE

Backend Developer | Codebotics Solutions | Bahawalpur, Punjab, Pakistan Jan. 2026 – Present

- Building Python automation scripts and web scraping pipelines for data extraction and processing workflows
- Developing Selenium and BeautifulSoup-based scrapers with anti-bot handling, checkpoint recovery, and CAPTCHA mitigation

Backend Developer Intern | Enigmatix | Bahawalpur, Punjab, Pakistan July 2025 – Dec. 2025

- Built scalable RESTful APIs using Django and Django REST Framework for web applications
- Collaborated with cross-functional teams to integrate frontend and backend services in an agile environment

PROJECTS

Amazon Canada Data Pipeline | *Python, Selenium, undetected-chromedriver, openpyxl* 2026

- Automated product data scraping from Amazon CA and US via UPC codes with dual-source fallback logic and anti-bot measures
- Implemented checkpoint recovery, CAPTCHA detection, and Excel output with structured field mapping

Afaa Elevate — Digital Academy Platform | *Django, PostgreSQL* 2025

- Built a full-featured digital academy platform with course management, user authentication, and a referral system to drive user acquisition
- Integrated PostgreSQL as the primary database and deployed the application on a live domain at afaaelevate.com
- Designed referral tracking logic and student enrollment workflows with a scalable Django backend architecture

Facial Check-In and Attendance System | *Django, OpenCV, face_recognition, SQLite* 2025

- Developed an employee facial recognition check-in kiosk system using OpenCV and face_recognition for real-time identity verification
- Implemented time management features including check-in and check-out tracking, attendance logs, and office hours reporting via Django admin

- Built a Django backend with SQLite storage to persist employee profiles, attendance records, and daily time summaries

Task Management Web Application | *Django, JavaScript, Bootstrap, SQLite* 2024

- Developed responsive task manager with real-time updates, email notifications, and collaborative features

ACHIEVEMENTS AND ACTIVITIES

- **Active Learner:** Continuously expanding expertise in cloud computing (AWS), automation, and modern web development
- **Problem Solver:** Passionate about tackling complex technical challenges and building efficient, scalable solutions
- **Team Collaboration:** Experienced in agile methodologies, version control workflows, and cross-functional team environments
